432 EVO REFERENCE MUSIC SERVER

432 EVO MASTER with true triple linear PSU
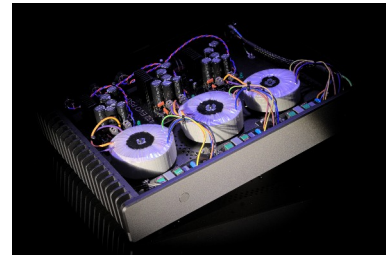

Best in class music server with audio grade dual USB output clocked by a separate dedicated low jitter superclock. 2 TB SSD on spring suspension system. Bitperfect TEAC cd-only ripdrive.

Logitech Media Server or Roon library server. Bitperfect output or custom upsampling up to 24/768 with SQi and/or 432 Hz post processing. Software jitter tuning, dedicated audio processing core and tuned realtime audio kernel.

Includes a separate custom high-end external true triple linear power supply with 3 independent buffered ultra low noise ultra fast DC rails for server, USB output and superclock boards. No shared transformer = superior design. Per country custom transformers, the real statement.

Description	MSRP
Ultimate dual enclosure 432 Hz music server. Color: black	15.500 €

432 EVO AEON & HIGH-END mk3 with dual PSU

Description	MSRP
AEON: similar to MASTER but with two Sbooster BOtW mk2 linear supplies, one for server and one for usb+superclock. 2TB full SSD storage with noise filtering. Color: silver or black.	7.600 €
HIGH-END: similar to AEON but with integrated clock on high-end USB output card instead of dedicated superclock board. Color: silver or black.	5.835 €

432 EVO STANDARD with linear PSU

Includes a single Sbooster BOtW mk2 linear power supply, HDMI audio and USB 2.0 audio output. Can be upgraded to HIGH-END, AEON or MASTER within the 2 year warranty period.

Description	MSRP
Entry level music server with 2TB full SSD storage and with internal rip facility Now with same motherboard as the HIGH-END, AEON & MASTER models – and twice as fast as the N4200 used by several competitors. Color: silver or black.	3.950 €

Options

For HIGH-END, AEON: upgraded sata cable + custom 3D printed shield for isolating dedicated USB output	400 €
For MASTER: upgraded sata cable + custom 3D printed shield for isolating dedicated USB output + full linear PSU for the SSD, with lowest "space agency" grade noise levels on market	500 €
Roon license 432 EVO comes with 2 bundled library server software packages: Roon and LMS. Switch between both in 10 seconds. For Roon, you need a license from Roon directly.	Starting $ 12,49 per month or $ 829,99 lifetime

HIGH-END can be upgraded to AEON or MASTER within the 2 year warranty period
AEON can be upgraded to MASTER within the 2 year warranty period

Autumn 2024 New features

432 EVO's own 432OS realtime enterprise grade operating system now with improved sound quality, stability and higher network throughput and a 10 year life cycle, is the new OS since September 2024 on all servers sold.

432 EVO MASTER: A strong challenger in the top segment

the absolute sound

"The 432 EVO Aeon is the best sounding music server I've listened to at length, a product that deserves the highest recommendation." – Andrew Quint

432 EVO's additional price list

432OS

For servers sold since September 2024	Already included
For servers sold before September 2024, with at least a j5040 mainboard – reinstall on existing SSD, with no data migration = factory reset but now with new OS	500 €
For servers sold before September 2024, with at least a j5040 mainboard – reinstall on a brand new 2 TB SSD, with no data migration = factory reset but now with new OS	1.000 €
Data migration of music and Roon / LMS / player settings	250 €

SSD upgrades

4 TB instead of the default 2 TB	500 €
8 TB instead of the default 2 TB	1.500 €
1.92 TB datacenter grade with 5Y SSD warranty, instead of the default 2 TB	320 €
3.84 TB datacenter grade with 5Y SSD warranty, instead of the default 2 TB	920 €
7.68 TB datacenter grade with 5Y SSD warranty, instead of the default 2 TB	2.015 €

Our datacenter grade SSD's are shielded, and feature hardware power loss protection, extreme reliability putting SATA DOM's to shame, improved latency and even higher sound quality. 432 EVO does not use SATA DOM's in any product.

432OS and SSD upgrades can be combined!
